

### **OUR WEB DEVELOPMENT EXPERTISE GUARANTEES QUALITY AND RAPID EXECUTION OF ANY WEB PROJECTS RANGING FROM CORPORATE WEBSITE TO COMPLEX CUSTOM PROGRAMMING & ENTERPRISE E-BUSINESS SOLUTIONS.**

Raavi provides professional website design, development, programming and maintenance services based on the latest technologies and industry trends. Our skilled web designers and developers accomplish various website projects from brochure sites to multi-functional web portals. Raavi has a large pool of resources and the required business and technical expertise to develop websites of any complexity. We network with the best professionals around the world to provide you the services required for today's successful business.

We develop unique website solutions to increase efficiency and competitive advantage of our clients. Our experience in providing successful web development, web design and ecommerce software development services and maintenance of sophisticated internet applications for different industries & market verticals helps us create solutions working trouble free from the outset.

### **Professional User Interface Designs**

With the help of modern design tools and latest web 2.0 trends, our designers create appealing, exclusive designs that highlight your uniqueness and let you stand out from the crowd. Irrespective of the website's functional complexity, we aim at keeping interfaces simple and easy-to-use.

We pay close attention to various aspects of front-end design to ensure positive online user experience:

- Appealing and professional style
- User-friendly interface
- Intuitive navigational schemes
- AJAX-powered front-end interactivity
- Consistent overall layout & corporate identity

### **Comprehensive Back-End Programming**

Functionality is what turns your website from a "shop display" into a powerful business tool. By delivering custom-built solutions Raavi is able to provide the functionality that would completely match your actual business requirements. Modular approach to development allows us to expand the existing or add new functionality easily and cost-effectively when your business requirements change.

Our specialists are able to create dynamic, highly interactive and functional websites, making cutting-edge technologies effectively back clean interfaces. We offer our clients a full spectrum of back-end development including dynamic page generation, database design and development, data encryption, advanced search mechanism integration, built-in security, real-time payment processing, audio/video streaming, etc.

### **Benefits of working with Raavi**

**Communication** - Our project managers fully understand the importance of seamless communication for the success of the project. Their working hours are shifted to cover most of the working day in Canada and the USA. They are very responsive and are willing to discuss project details with you to match your expectations 100%.

**Reasonable cost** - We use advantages of our global locations to provide highly cost effective solutions.

**Protection of your intellectual property** - We have a strong copyright protection policy. We do not sell the source codes to 3rd parties. All works that we do for our clients are considered to be "work made for hire" and belong to our clients. You are protected by US laws.
